TEA

To meet the demand for India and Ceylon Tea we have devoted our best efforts to procure through direct reliable channels the goods that elsewhere have given the most satisfaction. The firm of Joseph Tetley & Co. is one of the largest importers of these Teas and we have accepted their agency for Manitoba and the N.W.T. Their transactions are very large, they employ the best Tea experts and their name is a guarantee of quality. Firms who only import a few thousand pounds are not in a position to compete either in quality or value. "Once used always used." Use

BISHOP MERCER AND THE CHURCH.

It seems but a short time since Hon. Mr. Mercer, the Liberal leader in Quebec province, was paying as the representative, our comrade, of the Roman Catholic Church in that province. He went on ecclesiastical missions to Rome and had audience of the Pope. He was created by the Pope a Count of the Holy Roman Empire. He professed to have the interests of the Church especially at heart. He was a special agent in working up the religion and now sits in Quebec before and after the execution of Riel. He spoke and acted and legislated in the interests of the Jesuits, and altogether took on the air of a man who had been put forward as the special champion of the Church. In view of such facts, it is interesting to learn that according to his own showing he is no longer in the confidence of the bishops and priests of his church. On the contrary, he is publicly attacking them. Here is an extract from a speech delivered by him a few days ago to the members of the Club Lettard, of Montreal, one of the organizations of the Liberal party, apopos of the contest over the Manitoba school question:—

"Why," he asked, "were French-Canadians and Catholics divided as they were in Parliament? The cause lay in the education given them. That education was bad. It did not teach children to raise up their heads as free men. If they were taught what the rights of a free man they would not await the dictates of a priest or a bishop; they would think for themselves. (Applause.)

"Now, the clergy who had pushed them on to the way on this question wanted to withdraw. It was time to let them know that this was a question of race as well as of religion. The race of which belongs to the father of it. He who has not the courage to support a wife or bring up a family, is not competent to speak when the race is at stake."

It is clear from these statements that the Roman Catholic clergy of the Province of Quebec do not desire to push matters to extremes in connexion with this question, and this does not suit Mr. Mercer's card. He had hoped to rehabilitate himself in public opinion by working up a new religious cry in the French province, but it would appear that the bishops and priests are not anxious to sound his efforts. Hence his attack on them, and his sneer at the celibacy of the Roman Catholic clergy. It is plain from his language that he now aims to arouse a new race war; and it remains to see whether he will be successful or not. He is apparently a desperate man and is resorting to desperate means to rebuild his shattered political fortunes.

IMMIGRATION MATTERS.

The Montreal correspondent of a Toronto newspaper recently gave out that a heavy influx of Swedes from the manufacturing towns in the New England States might be expected in the Northwest the coming spring and summer. His information was probably obtained from the C.P.R. head office in Montreal. He wrote as follows:—

"I was surprised to learn that there are almost as many Swedes in New England as French Canadians. A better-looking and better-dressed lot of people I have never seen. Although they are earning fair wages in the States, they are fond of farming, and as there is no land to be had in the Western States they naturally turn to the Dominion. Their delegates who visited Prince Albert and other parts in the Saskatchewan Valley last year, came back delighted. The delegates paid cash for their homes and they have also taken up four townships of free Government land destined for their New England friends. They want more land than is yet surveyed in that district. The largest Swedish settlement is intended to be at Wetsaskiwin, south of Edmonton."

It is a great question whether the publication of facts such as these in advance of the actual movement of the emigrants does not do more harm than good. It certainly does in the case of parties who propose to leave the agricultural States; and yet the Government and other agencies are continually

publishing the details of their business in those States in connexion with what they and the settlers "are going to do". A little more reticence would better serve the interests of these Territories. It would also be well for our Canadian publications not to be circulating the delusion that "there is no land to be had in the Western States." As a matter of fact there is an abundance of land in the United States still unoccupied, and irrigation is bringing into prominence millions of acres of land there which, under the irrigation system, is becoming very valuable.

EDEXPENDITURE.

There is naturally a good deal of opposition in British Columbia to the Provincial Government's proposal to spend \$600,000 on legislative buildings in Victoria, when there is such a demand in the mining regions for the opening up of trails and the construction of railways. It must be noted that \$600,000 is a trifling sum in comparison with the amount of mineral wealth of British Columbia who would be of vastly more benefit to the province as a whole than the expenditure of that amount for the purpose of sumptuously housing the legislature and officials at the headquarters of government. It must also be admitted that both the Dominion Government, the Provincial Government and the Canadian Pacific Railway Company are wonderfully slow to recognize the existence of such vast deposits of rich minerals as are now known to exist in the Kootenay country, both east and west. Private capital and private enterprise are doing much to develop this region and to make its wonderful wealth known to the world, but the apathy and delay manifested by the two Governments and the great railway corporation are simply scandalous.

"The Chief Factor."

"The Chief Factor" is a tale of the Hudson Bay Company, by Gilbert Parker. It is interesting, though there is naturally something of Indian life in the story, which is well written and well constructed. Accompanying it is a shorter tale, "A Bicocca," which deals with an episode in the mining society. This, too, is bright and well told, although somewhat hackneyed in plot.

CURLING'S CARNIVAL.

A Grand and Brilliant Success.

A success—yes, and a grand one was the curling's carnival last night. Fully 200 persons paid to enter the arena there were over 200 gathered together. All of our prominent citizens with their wives and families were in the throng. The ladies' room opened and crowded with the fair, while from their post of vantage viewed the proceedings below, while the platforms were none too large to accommodate those who had assembled and the grand finale was expected to be a fitting finale from one end of the rink to the other. The two centre shots, which had been thrown into one, made a capital skating rink, and was thronged with skaters, many varieties of costume and gaudy costumes. In fact, many of those worn by the ladies were prepared to create a sensation in the breasts of their male admirers. The girls' shot was a most charming appearance. Among those who had evidently gone to considerable trouble with their dresses we noted Miss Leishman, Miss Minnie McEwan, Miss Shire, Miss Pettingill, Mrs. Robertson, Miss Rankin, Miss Beveridge, Miss Tschup, Miss Cowan, Miss Brus, Miss Grant, Miss Wilson, Miss McIntyre, and many others. The judges displayed the girls' prize to little Miss Fidell. The gentlemen boasted some first class make ups and Misses Douche, Pierce, Young, King, Mackay, and Wilkinson, were excellent personations. It was a brilliant affair indeed.

Around the curling games the spectators were densely packed and watched the play with the keenest interest. On No. 1, sheet a rink was set up with a number of boys who were not so late as old ladies—not so late as ladies by any manner of means, for they whooped and yelled in a manner that would have been disastrous to the teams of many a young man. The girls' shot was a success, by the way, secured the services of one of Calgary's leading mollies to furnish a dress of the latest Parisian style, was mistaken by G. L. Lafferty, a Calgary man, who was known to Calgarians, who, with the court of the ladies and the police court—they being under the impression that that somewhat eccentric lady had undertaken to give the boys a few lessons in skating, and that she was not too much to those of the balance of the rink. The boys, though not lacking in courtesy to the fair sex, to whom they are very partial, demonstrated to defeat the ancient sports, which were a great success. The rinks were completely covered with the most violent attack.

The judges were:—Ladies—Mrs. Douglas, Mrs. Glanville and Miss Jeanette. Gentlemen—Messrs. J. R. Smith, P. J. Nolan, H. H. McCollough.

The Fire Brigade band rendered a splendid programme of music, which was greatly enjoyed. The band numbered several new members, who, with practice, will prove a valuable addition to that organization.

Messrs. Smart, Waugh and Clayton are deserving of the greatest praise, and highly creditable men, in which they have carried out the arrangements and the success which attended their efforts.

Owing to a misunderstanding as to the hour, the hockey match did not commence until 10 p.m., but it is probable that it will do so at night during the present week; and there is some talk of another carnival being given.

TO THE MAYOR AND COUNCIL OF THE MUNICIPALITY OF THE TOWN OF CALGARY!

Gentlemen—I have to submit here with a short and detailed statement of Receipts and Expenditure of this town for the year ending December 31, A.D. 1882.

I have carefully examined all the accounts and find the books with the entries in the Treasury's books and in the books of the Receiver of Taxes are correct.

The books of the town have kept in a highly creditable manner.

Yours, very truly,

F. J. NOLAN,
Auditor.
